VERTICAL MULTI-STAGE CENTRIFUGAL PUMP SERIES

PUMP AND SYSTEM SOLUTION PROVIDER

Superior in Pump, Superior in Energy-Saving.

LAIKO Laiko Pump
Pump and System Solution Provider

LAIKO Pump(Zhejiang) Co., Ltd. is a subsidiary of Zhejiang Dayuan Pumps Industrial Co., Ltd. (Stock code: 603757), focusing on the research and manufacturing of energy-saving pumps.

LAIKO's applications cover the fields of construction, municipal, and industrial sectors. Currently, we have product lines including Inline Multistage Pumps, Inline Circulation Pumps, Horizontal Multistage Pumps, Cold and Hot Water Circulation Pipeline Pumps, Single-Stage Centrifugal Pumps, Standard Centrifugal Pumps, Stainless steel Horizontal Single-Stage Centrifugal Pumps, Submersible Sewage Pumps, and Immersed Multistage Centrifugal Pumps. Our products are exported to many countries and regions in Europe, America, and Asia, meeting local legal requirements and obtaining recognition from clients.

A standard research and development, production, sales, and service system has laid the core competitiveness and sustainable development space for LAIKO. Reliable product quality and thoughtful after-sales service have earned LAIKO widespread reputation.

LAIKO maintains a pioneering spirit, always adheres to the concept of technological innovation, and never stops exploring energy-saving endeavors!

Research and manufacturing of energy-saving pumps, providing pump and system solutions

With over 34 years of accumulated strength, we have formed an alliance with top domestic water pump research and development, production, sales, and technical teams, Established Zhejiang Laiko Pump Industry Co., Ltd. (referred to as Zhejiang Leike), with comprehensive strength ranking among the top in the industry.

The second-generation green intelligent factory of Industry 4.0 standard covers an area of nearly 200 acres, with an annual output of over 7 million units and a total investment of over 1 billion yuan.

Zhejiang Laiko has established a comprehensive sales and service network nationwide, with direct offices in major cities. Our products are exported to multiple countries and regions in Europe, America, and Asia. China Laiko pumps globally.

GREEN SMART FACTORY

Dayuan Pump Group and its subsidiary Laiko Pump Industry have implemented a significant strategic layout. Covering an area of nearly 200 acres with a total investment of approximately 1 billion RMB, the facility has an annual production capacity of 7 million units. It is a modern integrated factory that combines production, research and development, manufacturing, and logistics.

R&D STRENGTH

346	29	242	75	6
Domestic patents	Invention Patent	New utility patent	Appearance patent	Overseas patents

As a brand under Dayuan Pump Group, we have a strong foundation with over 177 R&D personnel and more than 352 patents. Our products have been honored with titles such as "Zhejiang Famous Brand Product" and "Zhejiang Export Famous Brand," and are exported to multiple countries and regions across Europe, America, and Asia. Our comprehensive strength ranks among the top in the industry. Through years of continuous investment in research and development, we have established a significant technological innovation advantage.

SERVICE COOPERATION

We have established offices in major cities across the country, supported by a professional and efficient service team. From consultation, purchase, after-sales, to maintenance, we provide high-quality, professional, timely, and attentive services at every stage.

Guided by the principle of "wholehearted dedication and customer-first," we respond quickly to customer needs, offering precise product recommendations and tailored solutions. Our comprehensive and full-cycle services ensure a worry-free experience for our customers.

SERVICE TENET: With all our heart and soul, Putting customers first

SERVICE TENET: Rapid response, Precise solution

SERVICE OBJECTIVES: Efficient O&M, Win-Win Cooperation

LAIKO

CDL / CDLF

Vertical Multi-Stage Centrifugal Pump Series

Superior in Pump, Superior in Energy-Saving.
www.laikopump.com

LAIKO Laiko Pump (Zhejiang) Co., Ltd.

CDL/CDLF

Vertical Multi-Stage Centrifugal Pump Series

The CDL/CDLF series is a high-efficiency non self suction vertical multi-stage centrifugal pump (hereinafter referred to as the pump), which has the characteristics of energy saving, low noise, environmental protection, compact structure, beautiful appearance, light weight, easy use and maintenance, and high reliability. The key overcurrent components are made using processes such as stainless steel stamping, precision laser welding, and stainless steel precision casting.

Low viscosity, non flammable and non explosive liquid that is prone to vaporization, and does not contain solid particles or fibers (CDL is suitable for non corrosive liquids, while CDLF is suitable for mildly corrosive liquids.). The liquid should not have a chemical reaction with the pump material. When the density and viscosity of the conveyed liquid are greater than water, a high-power motor is required. For more details, please consult our company.

LIQUID TEMPERATURE:

Room Temperature Type: -20 °C~+70 °C

Hot Water Type: -20 °C~+120 °C

Medium pH Value: 3~9 Maximum ambient

Temperature: +40 °C

Highest Altitude: 1000m

APPLICATION FIELD

Water Supply

Engineering Pressure Boosting

Water Treatment

Irrigation

Food and Beverage

Pharmaceutical Industry

TECHNICAL DATA

Flow range: 0.4~240m³/h

Head Range: 4~305m

Power Range: 0.37~110kW

Maximum Work Pressure: 33bar

Application Environment

CDL/CDLF series vertical multi-stage centrifugal pumps are suitable for conveying low viscosity, non-flammable, non-explosive,-vaporizable liquids without solid particles and fibers.

Water supply: high-rise building water supply and drainage, water plant filtration and transportation, pipeline pressure increase, etc.

Engineering pressure boosting: flushing and cleaning systems, boiler feedwater, cooling water circulation, etc. equipment matching systems

Water treatment: ultrafiltration systems, osmosis systems, distillation systems, separators, swimming pools, etc. water treatment systems

Irrigation: sprinkler irrigation, drip irrigation, etc. in agriculture

Others: food and beverage, pharmaceutical industry, etc.

Motor

Fully enclosed standard air-cooled two-pole standard motor

Protection level: IP55

Insulation level: F

Operating Conditions

Low viscosity, non-flammable, non-explosive, non-vaporizable liquids without solid particles and fibers and the liquid should not have a chemical reaction with the pump material. When the density and viscosity of the conveyed liquid are greater than water, a high-power motor is required. For more details, consult us please.

Liquid temperature: common temperature type: -20°C~+70°C

hot water type: -20°C~+120°C

Medium pH value: 3~9

Maximum ambient temperature: +40°C

Maximum altitude: 1000m

Ambient Temperature Effect

The highest motor environment is +40°C. When the ambient temperature of the motor exceeds 40°C or is installed above 1000 meters above sea level, the rated output power (P2) of the motor will decrease due to the poor cooling effect due to the low air density as shown in the figure. And a higher output power motor is required. For more details, consult us please.

As shown in the figure, P2 drops to 88% when the pump is installed above 3500 m and to 78% when the ambient temperature reaches 70°C.

Model Description

CDLF 32 - 10 - 3 - F - m - W - S - C

C:common temperaturetype; R:hot water type

S: 304; P: common type

W: 50Hz; L: 60Hz

three-phase(≤3kW is 220/380V; >3kW is 380V)(omitted)

m:single-phase220V B:pump body

F: flange; A: oval flange; K: clamp connection; G: threaded connection

small impeller stage

impeller stages

rated flow(m³/h)

CDL/CDLFvertical multi-stage centrifugal pump

CDLF: all flow passage components are made of stainless steel

CDL: the pump body and cover are made of cast iron

Minimum Inlet Pressure-NPSH

When the following conditions exist, it's recommended to calculate the inlet pressure "H": The liquid temperature is high; The flow rate is significantly greater than the rated flow; Pumping water from a lower level; Pumping water a long pipeline; Poor water inlet conditions.

To avoid cavitation, a minimum pressure must be ensured on the pump suction side. The maximum suction lift "H" can be calculated according to the following formula:

$$H = P_b \times 10.2 - NPSH - H_f - H_v - H_s$$

P_b =atmospheric pressure, unit in bar (atmospheric pressure is considered as 1 bar). In a closed system, P_b represents the system pressure(unit in bar).

$NPSH$ =Net Positive Suction Head, unit in meter(read from the NPSH performance curve).

H_f =suction pipe resistance loss, unit in meter (at the pump's maximum flow rate).

H_v =vaporization pressure, unit in meter (read from the vaporization pressure scale. Its value depends on the liquid temperature "tm").

H_s =safety margin, minimum value is 0.5m.

If "H" is calculated as a positive value, the pump can operate with a maximum suction lift of "H".

If "H" is calculated a negative value, the pump requires a minimum "H" suction pressure.suction lift of "H".

Note: To avoid cavitation, never select a pump with a duty point too far to the right on the NPSH curve. Always check the NPSH value of the pump at the highest possible flow.

Performance Curve Description

The tolerance of the curve complies with ISO9906: 2012.

The medium is air-free water at 20°C with kinematic viscosity $V=1\text{mm}^2/\text{s}$.

To prevent the motor from overheating or overloading, the pump should be used within the range of the bold curve.

Selection Data

When selecting the size of a pump, the following parameters should be considered:

The flow and pressure required at the point of delivery.

Pressure losses due to the height difference (H).

Friction losses in the piping (H_f), which may involve pressure losses due to long piping, bends valves, or similar structures.

The best efficiency at the estimated operating point.

The NPSH value. For calculations of the NPSH value, to the section on Minimum Inlet Pressure NPSH.
